Before celluloid: The stroboscopic animation principle was introduced in 1833 with the phénakisticope and also applied in the zoetrope since 1866, the flip book since 1868, and the praxinoscope since 1877, before it became the basic principle for cinematography. Experiments with early phenakisticope-based animation projectors were made at least as early as 1843. Jules Duboscq marketed phénakisticope projection systems in France between 1853 and the 1890s.

Some films in recent decades have been recorded using analog video technology similar to that used in television production. Modern digital video cameras and digital projectors are gaining ground as well. These approaches are preferred by some film-makers, especially because footage shot with digital cinema can be evaluated and edited with non-linear editing systems NLE without waiting for the film stock to be processed. The migration was gradual, and as of 2005, most major motion pictures were still shot on film.needs update

The lack of theatrical releases from Hollywood studios resulted in an anime film—Demon Slayer: Mugen Train—becoming the first-ever non-Hollywood film to top the annual worldwide box office. The film benefited from Japans relative control of the pandemic at the time of its release, the popularity of the franchise, and reduced competition from international films.120121 With both Los Angeles and New York City having allowed cinemas to reopen by March 2021, it was expected that film distributors would be more confident in releasing higher-profile films.122123 During that month, Disney announced that Black Widow would open in theaters on July 9, 2021 and would also be available on Disney+ the same day with Premier Access, following the same release strategy that was used for one of the companys other films, Raya and the Last Dragon.124 Two more of Disneys films, Cruella and Jungle Cruise, were also given this hybrid release.124125
